

How to use your Easyhaler

- Remove the lid from the device
- Hold the easyhaler upright and remove the cap from the mouthpiece
- Check dose counter to ensure there is medication left in the device
- Shake the device gently
- Press down the top of the inhaler once, it will make a clicking sound
- Take a deep breath in then breathe out fully.
- Place the mouthpiece in your mouth and take a long, strong breath in for as long as you can
- Remove from your mouth, holding your breath for up to 10 seconds.
- Repeat until the prescribed number of doses have been taken
